

Do you want more authentic,  
hands-on science happening  
in your classroom?

Join the GLOBE program and  
get your students involved in a  
worldwide research effort!

# The **GLOBE** Program

*Global Learning and Observations to Benefit the Environment  
An International Environmental Science and Education Program*

## GLOBE Helps Students

- Collect environmental data and report their observations to the GLOBE data base
- Create maps and graphs on the GLOBE Web site
- Analyze data and conduct research with scientists and other students
- Publish research results and share their data with others via the Internet
- Collaborate with other students and scientists around the world

## GLOBE Teachers gain

- Training through professional development workshops with content information and pedagogical strategies to support student research
- Measurement protocols and environmental education resources that have developed by scientists and educators
- Peer support by joining a network of over 54,000 GLOBE-trained teachers representing over 24,000 schools around the world

## Get Involved Today

To get your students involved in GLOBE activities, take advantage of one of our GLOBE teacher training opportunities at NASA's Langley Research Center in Hampton, VA.
